

ZebraScope® 5 Limited-Reusable Ureteroscope

THE LIMITED-REUSABLE DIGITAL URETOROSCOPE 5 TIMES USE

KEY BENEFITS

- Up to 5 times sterilizations
- Maintaining the best performance and imaging
- Reducing the cost of disposable ureteroscope adoption
- Usage timer available

ZebraScope® 5 limited-reusable Uretoroscope is a disposable uretoroscope with 5 times limited use solution that gives you a way to take control of your clinical budget. This is to meet the needs of local hospitals which cannot afford the traditonal expensive reusable ureteroscope and disposable ureteroscope.

As the first brand of single-use flexible ureteroscope launched in China, the successful launch of ZebraScope® is available in over 2000 hospitals. With the awareness of coming from the clinic and serving the clinic, we discovered that there are many hospitals and clinics that lack patients due to a lack of equipment worldwide. In Brazil, according to RH Astolfi (06, 2020), the main reason discussed that the local hospitals were hugely affected due to a lack of equipment or adequate hospital infrastructure with for URS (23%) and F-URS (38.1%), while for PCNL the lack of practical experience was the main reason (29.9%). Carrying the mission of being the provider of the disposable endoscope to improve human health, we launch the ZebraScope® 5 limited reusable ureteroscope which combines the features of both disposable and reusable ureteroscope.

ZebraScope® 5 limited-reusable ureteroscope enables hospitals to offer kidney stone management locally with an affordable budget. It can be used up to 5 times during sterilizations while maintaining the

best performance conditon of the scope. As a result, ZebraScope® 5 simplified workflow, provides high-quality images and reduces cross-contamination, so you can assure your patients get a local kidney treatment with the best performance.

Environmental

Happiness Works Medical is committed to a healthy environment. With this in mind, we have designed the ZebraScope® and the packaging to reduce the environmental impact. We have also kept the environment in mind when designing our packaging which is minimized to create less waste. The cardboard and plastic packaging is 100% recyclable.

SPECIFICATIONS

OPTICAL SYSTEM	
Field of View	100°
Direction of View	0°
Depth of Filed	2mm - 50mm
Illumination Method	LED
INSERTION PORTION	
Bending Angle	275° up 275° down
Insertion Cord Diameter	≤2.9mm
Distal End Diameter	7.4 Fr
Length of Insertion	670mm±10mm
WORKING CHANNEL	
Minimum Instrument Channel Diameter	3.6 Fr
STERILIZATION	
Method of Sterilization	EO
MATERIAL	
DEPH Phthalates	Does not contain any DEPH phtalates
No allergenic substances	Not made with natural rubber latex
DIMENSIONS	
Weight	298g

VIDEO PROCESSOR HV-200		
Voltage	AC 100-240V	Processor Front  Remo Socket Control panel Host Switch Processor Back  Power Interface Video Output interface Grounding post
Frequency	50/60Hz	
HQ Pixel	200*200,400*400,800*800,1000*1000	
Key Function	LED Dimming Adjustment	
	Image zooming & freezing	
	Dislay Adjustment Brightness & Saturation & Contrast	
	White Balance Adjustment	
	Picture & Video Taking	
	Video Ratio	
Video Output	Handle Bunton Customization	
	Support digital signal DVI, HDMI, SDI output	
	Pressure measurement mode output	
Dimensions	300mm X 300mm X 100mm	
Weight	3.109kg	

ORDER SPECIFICATIONS

PRODUCT	TYPE NO.	QUANTITY
ZebraScope® 5 Limited-Reusable Ureteroscope	HUR-101	1pcs
ZebraScope® Processor	HV-200	1pcs

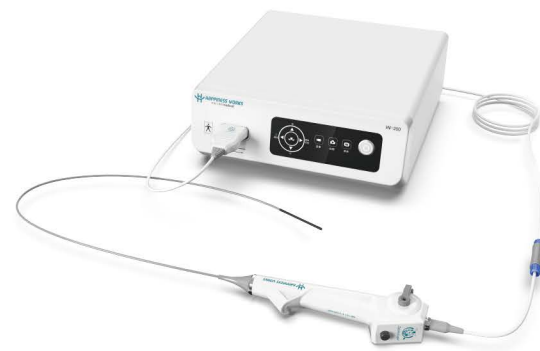

Shortcut Button

The shortcut button is located on the top of the handle for easy operation. During the procedure, you can quickly shoot, video, freeze the frame, zoom out, and white balance

The only one equipped with snake-bone-covered woven mesh

ZebraScope is the only endoscope containing snake bone and covered with woven mesh which is safer for clinical use. It would effectively prevent accidental damage caused by the broken snake bone which could lead to the risk of being unable to withdraw the ureterscope.

Unique stereo deflection function

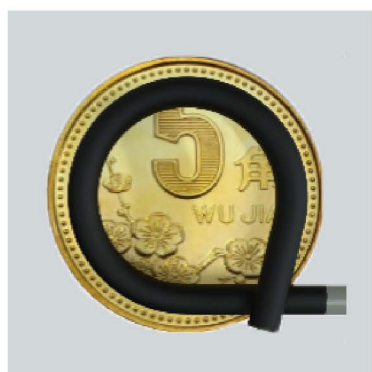

The distal end with a unique stereo deflection function of 12.5° and a minimum bending radius of 8mm which enables the ureterscope with the best performance on the small IPA renal calyx stones.

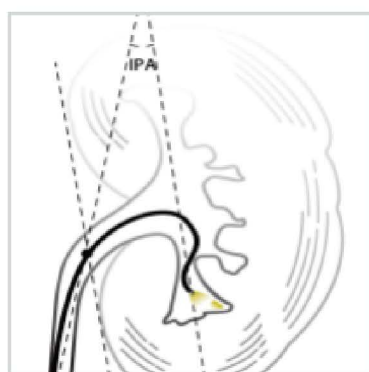

3.6 Fr Working Channel

Usage Timer

Usage timer available

Bending Radius 8mm

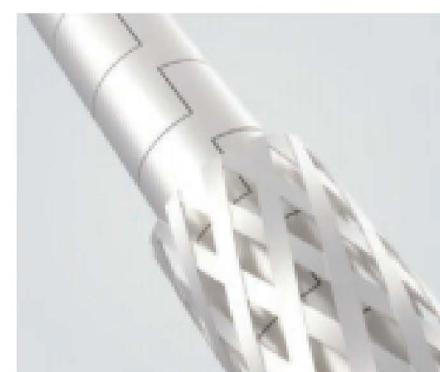

Passive bending
